Les Jardins Glenelm are the local farmers that will supply us with our delicious vegetables!

“On our one-acre farm, we grow over 30 varieties of vegetables that rank among the best on the market. Our products stand out because of their taste, nutritional value and colour, rather than their ability to withstand long-haul shipment. Grown without the use of synthetic pesticides or fertilizers, our Ecocert-certified organic vegetables are always deliciously fresh. We are proud to be family farmers!”
